Russian Academy of Sciences. Izvestiya. Mathematics

CONTENTS

Volume 42, Number 1, 1994

D. Z. Arov, The generalized bitangent Carathéodory-Nevanlinna-Pick problem, and (j, J_0)-inner matrix-valued functions 1

E. N. Domanskiĭ, On Maslov regularizability of discontinuous mappings 27

V. I. Dragovich [Dragović], Solutions of the Yang equation with rational irreducible spectral curves 51

Vik. S. Kulikov, Alexander polynomials of plane algebraic curves 67

V. V. Ryzhikov, Joinings, intertwining operators, factors, and mixing properties of dynamical systems 91

B. N. Khabibullin, The theorem on the least majorant and its applications. I: Entire and meromorphic functions 115

S. A. Grigoryan, Generalized meromorphic functions 133

N. N. Kholshchevnikova, On sets of uniqueness for series in various systems of functions 149

S. Yu. Zyuzina, Constructibility of exceptional pairs of vector bundles on a quadric 163

K. T. Mynbaev, On approximation of integral operators, their kernels, and solutions of Fredholm integral equations of the second kind in connection with an operator of Sturm-Liouville type 173

S. A. Nazarov, Asymptotics of the solution of a boundary value problem in a thin cylinder with nonsmooth lateral surface 183

Volume 42, Number 2, 1994

A. I. Bondal and A. E. Polishchuk, Homological properties of associative algebras: The method of helices 219

N. K. Vereshchagin, Relativizable and nonrelativizable theorems in the polynomial theory of algorithms 261

È. N. Makhmudov and B. N. Pshenichnyĭ, The optimality principle for discrete and differential inclusions of parabolic type with distributed parameters, and duality 299

P. V. Paramonov, On approximation by harmonic polynomials in the C^1-norm on compact sets in $\mathbf{R}^2$ 321

A. N. Tyurin, Spin polynomial invariants of smooth structures on algebraic surfaces 333

V. V. Shokurov, Semistable 3-fold flips 371

Volume 42, Number 3, 1994

V. A. Iskovskikh, F. K. Kabdykairov, and S. L. Tregub, Relations in the two-dimensional Cremona group over a perfect field 427
B. N. Khabibullin, The theorem on the least majorant and its applications. II. Entire and meromorphic functions of finite order 479
M. V. Karasev and A. V. Pereskokov, On connection formulas for the second Painlevé transcendent. Proof of the Miles conjecture, and a quantization rule 501
O. V. Verbitskiĭ, On the possibility of performing any multi-prover interactive proof in constantly many rounds 561
V. A. Oskolkov, On the basis property of certain polynomial systems in spaces of entire functions of exponential type 587
G. A. Sviridyuk, Quasistationary trajectories of semilinear dynamical equations of Sobolev type 601
A. M. Vdovin, Extension of a new axiomatic set theory 615
S. M. Ageev, Topological proofs of Keller's theorem and an equivariant version of it 621
